

PEV系列欧版颞式破碎机

PEV series european jaw crusher

欧版颞式破碎机是我公司经多年经验沉淀，通过对传统颞式破碎机优化升级而研发出的新一代颞式破碎机，能够满足更复杂的工况需求，是粗碎各类较硬金属矿石的优选设备，它集产量高、能耗低、结构可靠等诸多优势于一身。

The European version of the jaw crusher is our company after years of experience, a new generation of jaw crusher developed by optimizing and upgrading the traditional jaw crusher, it can meet the needs of more complex working conditions and is the preferred equipment for coarse crushing of various hard metal ores. it combines many advantages such as high output, low energy consumption and reliable structure.

产品优势

>> Product Advantages

1、结构坚固

非焊接可拆解机架，易损件更换简单，设备坚固可靠。

2、破碎比大

优化运动参数，冲程更大，动力强劲，作业效率高。

3、设计合理

对称“V”形破碎腔，高产高效；减震设计，安全低噪；动颚护板，耐磨耐冲击；超大轴承设计，承载能力强。

4、运行平稳易安装

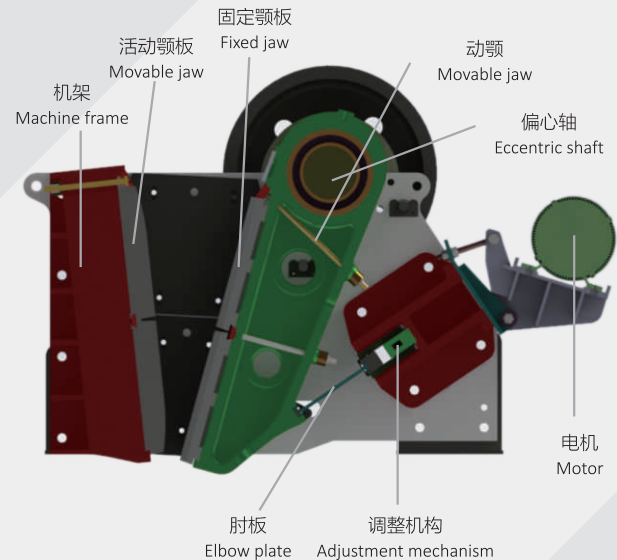

整体铸钢轴承座结构，轴承径向载荷小，运行更平稳；一体化电机座结构，安装调整方便。

5、原材优选

关键部件均选用国内外优质原材料，质量可靠，设备整体故障率低。

6、粒型均匀

新型楔块出料调节方式，操作简单、高效，粒度可控更均匀。

1. Sturdy structure

Non-welding detachable frame, easy replacement of wearing parts, strong and reliable equipment.

2. Large crushing ratio

optimize motion parameters, bigger stroke, powerful, High operating efficiency.

3. Reasonable design

Symmetrical "V" shaped crushing cavity, high output and high efficiency; Shock absorption design, safe and low noise; The movable jaw guard plate is wear-resistant and impact-resistant; Super large bearing design, strong carrying capacity.

4. Stable operation and easy installation

Integral cast steel bearing seat structure, the bearing radial load is small, and the operation is more stable; Integrated motor base structure, easy to install and adjust.

5. Selection of raw materials

The key components are all made of high-quality raw materials at home and abroad, with reliable quality and low overall failure rate of the equipment.

6. Uniform particle shape

New wedge fast discharge adjustment method, the operation is simple and efficient, and the particle size is controllable and more uniform.
